'Together we learn – United we achieve'

CALCULATION POLICY

Our vision

At Townville Infants' and Nursery School we aspire to offer the best possible early education for our children in a happy, safe, inclusive environment. We build firm foundations through a welcoming, holistic community approach placing the individual needs of the child at the heart. With high expectations and aspirations for every child we seek to ensure all children develop the skills and attributes they need to thrive and succeed both now and in the future.

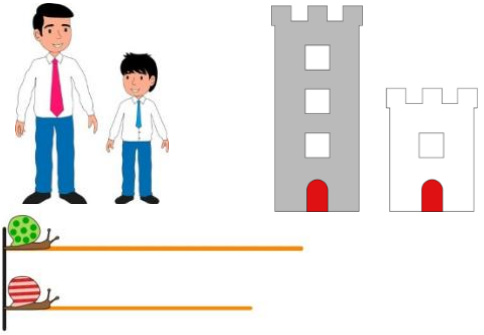

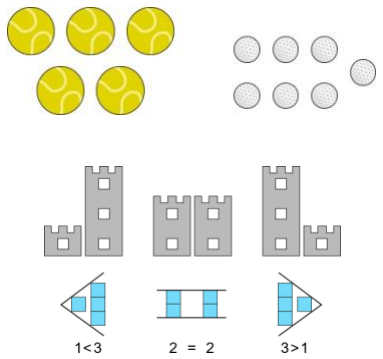

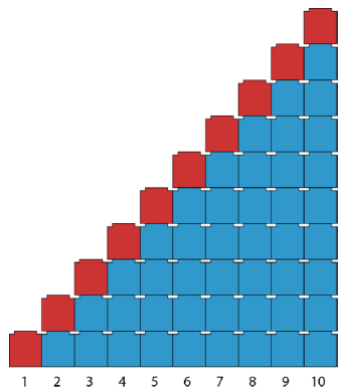

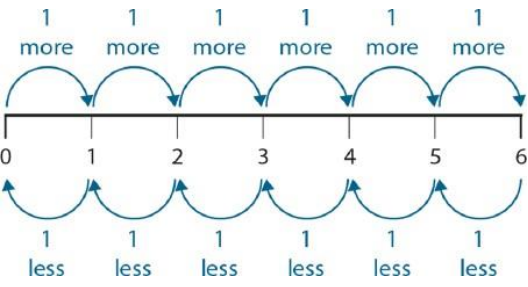

Approved by:	C Burden	Date: 02/05/2024
Last reviewed on:	March 2022 May 2024	
Next review due by:	May 2026	

This policy is a working document and will be revised and amended as necessary.

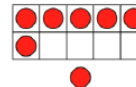

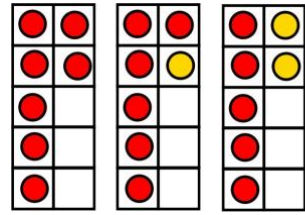

This policy lays out the expectations for both mental and written calculations for the 4 number operations and has been created to support the teaching of a mastery approach to mathematics. This is underpinned by the use of models and images that support conceptual understanding and this policy promotes a range of representations to be used across the primary years. Mathematical understanding is developed through use of representations that are first of all concrete (e.g. Dienes apparatus and place value counters), and then pictorial (e.g. bar models) to then facilitate abstract working (e.g. standard written methods). This policy is a guide through an appropriate progression of representations and if at any point a pupil is struggling with the abstract, they should revert to familiar pictorial and/or concrete materials/representations as appropriate.

This policy uses materials directly from the NCETM guidance in line with teaching a mastery approach.

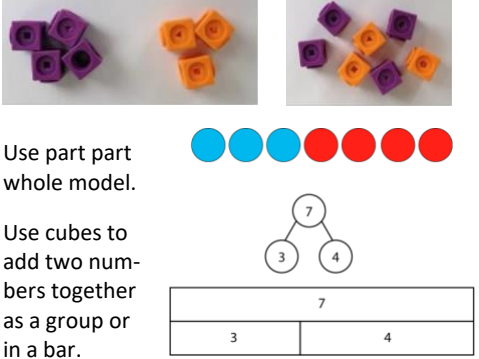

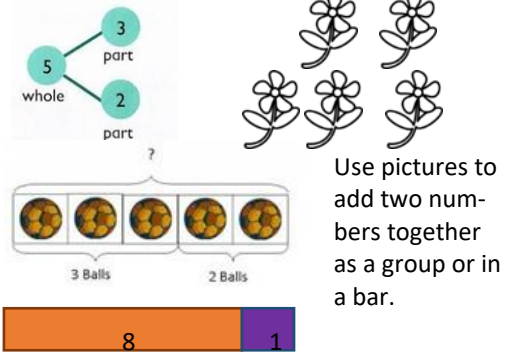

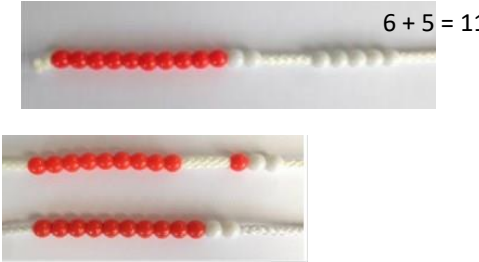

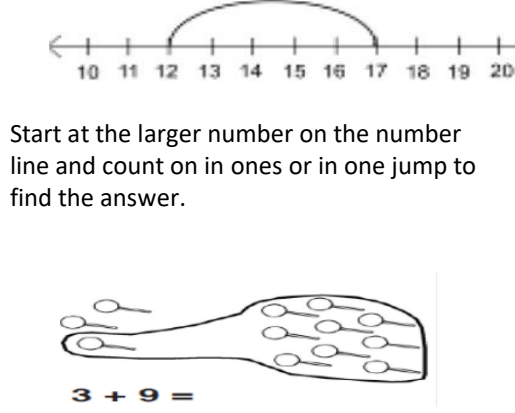

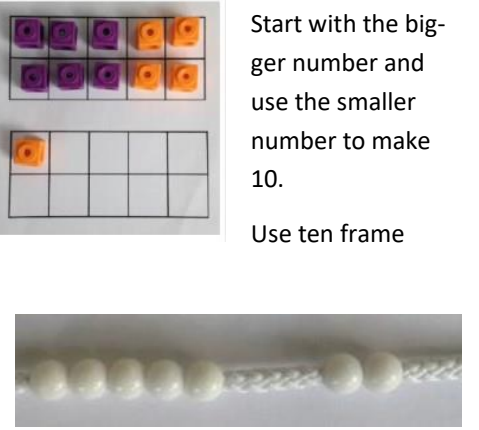

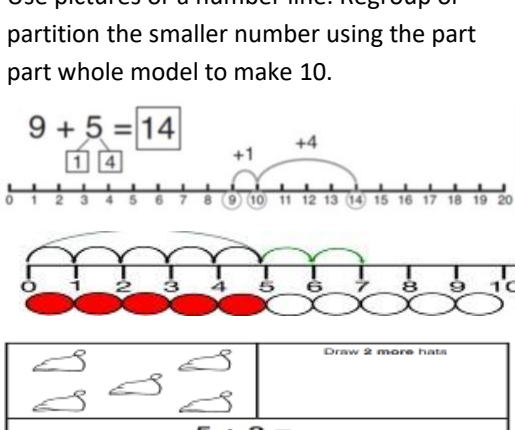

Y1 ADDITION

Objective, Strategy & Key Vocabulary	Concrete	Pictorial	Abstract
<p>Comparing Objects, groups of objects</p> <p>Length, weight, mass, heavier, lighter, same, equal</p>	<p>People's height, distance, mass.</p> <p>Use of pan balances using numicon to show equivalence, < ></p> <p>Comparing multiple objects</p> <p>Use of concrete materials eg. Compare bears, jewels, cubes etc to create groups of different sizes to compare</p>		
<p>Using < > and =</p> <p>Fewer, more, less than, more than, equal to, fewer than</p>	<p>Use a multilink staircase in two colours</p>		<p>Use variation with missing boxes and missing symbols.</p> <p>$3 \bigcirc 4$ $4 > \square$</p> <p>$2 \bigcirc 2$ $\square < 6$</p>
<p>Finding one more, finding one less</p>			<p>One more/less sentences – example one:</p> <p>1 more than 3 is <input type="text"/></p> <p>1 less than 2 is <input type="text"/></p> <p>1 more than <input type="text"/> is 1</p> <p>1 less than <input type="text"/> is 1</p>
